

An Alliance Custom Truck Sleeper System will enhance the comfort of your living quarters and save you fuel and money while you rest. These systems are engineered for extreme conditions and will also charge your truck's batteries whenever the system is running. The system's compact size and high efficiency, provides quiet performance and highly directional air flow for wide, evenly distributed coverage.

Using these highly efficient systems allows the driver to have A/C, heat and 110 volt electricity available in the truck sleeper at a very affordable price, without idling the truck's engine. Not idling the truck's engine will result in typical savings that will pay for the Alliance Truck Climate System in approximately a year or less.

More and more truckers are finding out they can't do without a Climate System due to the increasing number of states with anti-idle laws.

**Alliance Custom Premium Auxiliary Power Unit System w/ 3.5kw Generator**  
*Specifications: (Provides 3500 Watts of 110 Volt Electricity)*

Kubota Diesel Engine	Single Cylinder
Horizontal Four Cycle	Water Cooled
Horsepower	7 @ 2,800 RPM
Dry Weight in Pounds	260 (Approximately)
Measurements (L x W x H)	30.5" x 25.5" x 15.5"
Approximate Fuel Consumption	0.1 gallon per hour
System Battery Charger	40 Amp
Compressor, Auto Type (R-134a)	8 cubic inches
Total System Weight in Pounds	360 (Approximately)

*External Oil Pump Filtration Included*

**Custom Installation Designs**

***Air Distribution Ducts Blend with Interior***

**APU Evaporator**  
*Specifications:*

Cooling BTU	12,000 per Hour
Heat BTU	10,000 per Hour
Air Flow (Cubic Feet)	360 per minute
Measurements (L x W x H)	19" x 15" x 10.5"
Weight in Pounds	21
Refrigerant	R-134a
